Spec Sheet

Commercial Belt Drive Pumps

Rapidcool commercial belt drive pumps are the answer for large projects that demand absolute reliability. Belt drive pumps are available in many sizes from 1 GPM to 60 GPM and in all voltages and phases.

All pump drives are custom built to meet the demands of the system they are matched to. Primarily built with Cat Pumps and Baldor motors.

Filtration is standard as is low water shut-off. Larger motors are motor contactor controlled and overload protected. Frames are powder coated as standard and stainless frames are available.
